Sudelektra established in 1926.
 Glencore acquires 38.5 percent of Sudelektra in 1990.
 Xstrata converts to PLC; acquires Duiker & Enx (\$2.5 billion) in 2002.
 Xstrata acquires MIM Holdings (\$3 billion) in 2003.

CMS does not have Enx or Duiker coal production data prior to 1998
 CMS does not have coal production data for Glencore or M.I.M. (acq by Xstrata)

Summary production data

(million tonnes)	Year ended 31.12.08	Year ended 31.12.07
Total consolidated production	85.5	82.8
Australian coking	6.9	6.8
Australian semi-soft coking	5.3	6.4
Australian thermal	40.2	35.0
South African thermal*	22.7	24.7
Americas thermal	10.4	9.9
Consolidated Australian sales total	51.8	46.5
Coking export	7.0	6.0
Semi-soft coking export	5.3	6.4
Thermal export	31.3	26.6
Thermal domestic	8.2	7.5
Consolidated South African sales total*	24.0	24.9
Thermal export	12.3	13.7
Thermal domestic	11.7	11.2
Consolidated Americas sales total	10.5	9.9
Attributable Australian sales total	49.5	43.9
Coking export	7.0	6.0
Semi-soft coking export	4.8	5.8
Thermal export	29.6	24.7
Thermal domestic	8.1	7.4
Attributable South African sales total*	19.6	20.1
Thermal export	9.8	11.0
Thermal domestic	9.8	9.1
Average received export FOB coal price (\$/t)		
Australian coking	232.5	98.1
Australian semi-soft coking	157.5	62.5
Australian thermal	95.6	51.2
South African thermal	78.4	51.7
Americas thermal	80.9	52.3

* For production reporting, DTJV is included for the full year ended 31 December 2008. For financial reporting, DTJV is excluded from Xstrata Coal's ex-mine results due to the DTJV restructuring announced on 3 March 2008

Cell: H9**Comment:** Rick Heede:

Glencore Xstrata was formed following the merger of Glencore International plc and Xstrata plc, which was completed in May 2013. The merger brought together two highly complementary businesses with a long-standing relationship. Glencore and Xstrata already worked together for more than ten years through a number of marketing agreements including a ferroalloys marketing agent agreement (since 1997), coal advisory agreement (since 2002) and exclusive nickel and cobalt marketing agreement (since 2007).

The histories of Glencore and Xstrata have been inextricably linked since March 2002 when Xstrata acquired Australian and South African coal assets of Glencore, the largest shareholder in Xstrata at the time. At the same time Xstrata listed on the London Stock Exchange.

Glencore's business commenced in 1974 as Marc Rich + Co AG and initially focused on the physical marketing of ferrous and non-ferrous metals and minerals and crude oil, and shortly thereafter expanded into oil products. In 1981, Glencore acquired an established Dutch grain trading company, which created the basis for its Agricultural Products business segment, and later Glencore added coal to its Energy Products business segment. Starting in 1987, Glencore developed from a purely commodity marketing company into a diversified natural resources group through key acquisitions in mining, smelting, refining and processing in the three principal business segments. In 1994, the founder of Glencore sold his stake by way of a management buyout. The shares of Glencore International plc listed on the London and Hong Kong Stock Exchanges in May 2011.

The roots of Xstrata date back to 1926 when Swiss infrastructure company Südelektra AG was established. Beginning in 1990, the company (which was renamed Xstrata AG) built a portfolio of businesses operating in the natural resources sector. On 25 March 2002, Xstrata plc was created through an initial public offering on the London and Swiss stock exchanges and at the same time it acquired Glencore's coal assets. The successful acquisition and integration of MIM in 2003 and of Falconbridge in 2006 were key elements in the transformation of Xstrata.

Cell: D11**Comment:** Rick Heede:

Coal production by coal mining companies and state-owned enterprises, including subsidiaries of oil and gas companies.

Coal types produced are not ordinarily reported by coal operators (except for metallurgical coal). We distinguish, where possible and reasonably well known, between hard (bituminous and subbituminous) and soft (lignite or peat) coals, especially for the larger companies operating in regions such as Australia and India where soft coals are predominant. Soft coals have lower carbon content per tonne than do hard coals.

"Sales volume (Mt)" for both Enex Australia and Duiker (presumably South Africa) from ENEX Resources Ltd (~2001) Annual Report, p. 15, or a similar attachment to the Australian Securities and Investments Commission by Mallsons Stephen Jaques, Solicitors, upon the prospective sale of Enex assets or merger with Glencore, which later became Xstrata. Contact: Stephen Minns, Partner, 61-2-9296-2288, stephen.minns@msj.com.au, Sydney.

"Mine production" (p. 51) differs somewhat from "sales" above: namely 42.6 million tonnes in 2000.

Cell: E64**Comment:** Peter Roderick (2March2006):

Glencore International AG was the (ultimate) shareholder in both Enex Resources Ltd and Duiker Mining Limited, that the businesses of ENL & DML were transferred to Xstrata AG, which then merged with Xstrata plc and Glencore International AG became a 40% shareholder in Xstrata plc.

Ar 2010 pdf pg 63, sum total coking coal and total semi-soft coking

Cell: G83**Comment:** Rick Heede:

Xstrata does not provide coal rank or heating value for its production of Australian, South African, and Colombian "thermal coal." Considering the typical high-quality coals mined in Colombia, South Africa, and NSW for export, CMS applies the heating value and carbon factor for "bituminous coal."
